Dear Hiring Team,

I am writing to apply for the Product Owner position at Corpay. With more than 10 years of entrepreneurial experience leading projects, managing operations, and translating business needs into delivered solutions, I believe I can bring strong ownership, execution, and cross-functional alignment to your team.

In my work as a business owner and freelance web developer, I have managed work from scoping through delivery, collaborated directly with founders and stakeholders, and balanced priorities, constraints, and outcomes to solve real-world problems, demonstrating my ability to communicate effectively, turn abstract goals into actionable work, build clarity across a project lifecycle, and stay focused on delivering measurable value.

I am now pursuing a B.S. in Computer Science at UMKC, where I have built hands-on experience in software development, data workflows, and machine learning, giving me the foundation for working effectively with engineering teams, understanding system requirements, and contributing to modern delivery practices, including AI-enabled workflows.

What draws me to Corpay is the opportunity to contribute in a role centered on clear ownership, stakeholder alignment, and outcome-focused delivery. I would welcome the opportunity to bring my background to your Corporate Payments team.

Thank you for your time and consideration.

Sincerely,
Tyler Prince
