**Dear Dropbox,**

I am thrilled to apply for the Software Engineering Intern role (Summer 2026) as a Computer Science student expected to graduate from the University of Missouri - Kansas City in Spring of 2028.

To me, Dropbox is the ideal environment for learning and growing as an engineer, and the opportunity to contribute to a product and a company I admire is a career milestone I would be deeply proud of. I am drawn to the excitement of your engineering challenges and the chance to develop my skills alongside the mentors in your Emerging Talent program.

Here's how my coursework and projects align with the technical requirements of this internship:

**Python Development:** I have completed UMKC's Python Programming coursework and built multiple applications in Python, including a Video Game Transaction Analyzer, an OOP Theater Booking System, and others. I engineered these tools to handle large datasets, manage complex booking states, and ensure individual data integrity.

**System Design & OOP:** My Workout Builder project demonstrates my ability to model complex domains using Object-Oriented principles. I focused on modular design and persistent storage to create a functional, scalable application.

**AI Proficiency:** I am proactive in adapting to the future of engineering. I earned a certification in Microsoft Azure AI Fundamentals and actively experiment with tools such as Hugging Face, OpenAI, and Google Antigravity to learn how to build and integrate intelligent features.

**Professional Reliability:** While I am a student, I bring 10 years of prior work experience as a self-starting entrepreneur. This background ensures I am socially comfortable in a professional environment, skilled in time management, and ready to immediately navigate a "Virtual First" distributed team effectively.

My most important skills are the ability to learn and adapt quickly, a profound work ethic, and a passion for working with others. It would be an honor to contribute these as a team member in the Emerging Talent program. Thank you for your time and consideration.

Respectfully,
Tyler Prince
