LinkedIn Scan Report

Optimizing your LinkedIn profile to attract recruiters or supplement your resume in your job search!

Scan Date: Aug 5, 2025

Computer Science Student | AI-900 Certified | Building AI-Powered Solutions with Azure, React & Python | Open to Entry-Level Tech Roles & Internships

- Software Engineer - Mobile
- Information System Intern
- Research Intern
- ML Engineer - AI

22 Needs improvement | 33 Well done

see below for areas to improve.

Basic Information

Full name	First and last name found in your contact information
Profile picture	You have included a profile picture, that exponentially increases your profile views and messages received
Background picture	We could not find a background picture in your profile.
Location	Adding a specific location and country helps recruiters find you - more than 30% of recruiters will search by location.
Industry	You specified your industry.
Open To Work	Your 'Open to Work' status is enabled. This increases your visibility to recruiters and the LinkedIn community, enhancing your chances of being contacted for job opportunities.

High Impact

Headline

"Computer Science Student | AI-900 Certified | Building AI-Powered Solutions with Azure, React & Python | Open to Entry-Level Tech Roles & Internships"

- Length of headline is good.
- We recommend including the exact title **Software Engineer - Mobile** in your headline. Recruiters frequently search by job titles and exact phrasing ranks higher in search results.
- We found **AI** in your headline.
- Special characters were not overused in your profile headline.

Profile summary

"I'm a Computer Science student at UMKC (4.0 GPA) and AI-900 certified, specializing in AI-assisted full-stack development. I build real-world systems by leveraging LLMs as a force multiplier for rapid prototyping, debugging, and integrating complex components across cloud platforms. My current project, ResumAI, is an AI-driven resume tailoring system that combines Azure OpenAI, Cognitive Search, Cosmos DB, React, and Python to analyze job descriptions and generate optimized, tailored resumes using semantic search, schema-based extraction, and retrieval-augmented generation pipelines. With over 10 years of entrepreneurial experience managing operations, leading projects, and solving real-world problems, I bring a blend of technical capability, business acumen, and adaptive learning to every challenge. Open to opportunities in AI development, cloud systems, and full-stack web development, where I can apply my skills to deliver impactful, scalable solutions."

- Length of summary is good
- We recommend including the exact title **ML Engineer** in your summary. Recruiters frequently search by job titles and exact phrasing ranks higher in search results.
- We found **AI, Computer Science** in your summary.
- Special characters were not overused in your profile summary.
- The tone of your summary is generally positive and no common cliches and buzzwords were found. Good job! Tip

Provide at least two measurable results in the About section of your profile (Example: increased sales by 20%) Tip

As an ML Engineer with over 10 years of experience, I specialize in AI integration and data engineering. Backed by certification in Microsoft Azure Machine Learning and a background in computer science, my expertise lies in creating AI-powered solutions to enhance business operations and lead generation.

I've utilized my skills to successfully operate a digital consultancy, support early-stage companies, and grow my own window cleaning business across the Kansas City metro area. From utilizing WordPress, HTML, CSS for web development to deploying technical SEO and Google Ads management, I have consistently improved visibility and customer acquisition.

In addition to this, my experience includes coordinating events for local entrepreneurs and assisting them with refining their messaging and connecting with resources within the startup ecosystem. This diverse range of experiences has strengthened my ability to deliver clean, functional systems under constraints while aligning technical execution with business goals.

Looking forward, I am eager to leverage my unique skill set towards building robust AI solutions that drive innovation and efficiency. If you're looking for someone who combines technical expertise with proactive problem-solving skills, let's connect!

Work Experience

History ⓘ
✓ Work experience contains at least 3 jobs.

Short term gigs ⓘ
✓ No short-term gigs were found or all were correctly labeled.

Job title match ⓘ
✗ ML Engineer didn't appear in any past or current job titles from your work experience.

Measurable results ⓘ
✗ Some of your job entries lack measurable results. To strengthen your profile, include at least two specific achievements or areas of impact for each job you had (e.g., "Increased sales by 20%") Tip
