LinkedIn: https://www.linkedin.com/in/tyler-ppwc | GitHub: https://github.com/Tjprimc09

I am an entrepreneur-turned-engineer, currently pursuing a Bachelor's degree in Computer Science. I want an engineering role in quantum computing, machine learning, or AI, because I am passionate about solving challenging problems at the frontier of technology that have the potential to benefit others. I bring an agile mind and a deep desire to learn. I have a background of initiating and owning projects through to completion, identifying and solving problems, building organizations, designing systems, and collaborating with others to solve real-world challenges.

PROFESSIONAL EXPERIENCE

Prince Professional Window Cleaning LLC | Owner / Founder | 2014- 2024

- Grew a post-construction and commercial cleaning business organically from knocking on doors in my neighborhood to winning large contracts with private schools, luxury apartment complexes, hotels, and corporate campuses throughout Kansas City.
- Optimized business systems through continuous learning and iterative improvements to deliver increasing value.
- Led a diverse team and coordinated logistics in high-stakes environments to deliver results that secured repeat business.

Reach Digital Positioning | Freelance Web Developer | 2016 – 2024

- Taught myself the fundamentals of HTML, CSS, web development, and took free online courses in advanced SEO and digital marketing.
- Shipped custom websites and managed the full delivery lifecycle for early-stage startups and local service-based companies. Optimized search engine discoverability, site performance, and user experience for stakeholders using data-driven insights and advanced SEO practices.
- Communicated effectively with stakeholders to transmute business requirements into technical solutions.

1 Million Cups Kansas City | Community Organizer | 2016 – 2020

- Curated, coordinated, and emceed large weekly events that showcased local early-stage startups.
- Collaborated with presenters to craft and refine their pitch and messaging.
- Facilitated connections between entrepreneurs, investors, and community leaders.

EDUCATION

University of Missouri - Kansas City (currently enrolled)
Bachelor of Science in Computer Science | Expected Graduation: 2029
GPA: 3.8
Relevant Coursework: Python and Java Programming, Discrete Structures, AI Fundamentals, Data Fundamentals
Activities: "Roo" Hackathon Participant (Fall 2025)

PROJECTS

Video Game Transaction Analyzer | Python, Data Engineering

- Engineered a data pipeline to ingest and validate large datasets of transaction records.
- Implemented robust error-handling and cleaning logic to filter malformed data and ensure data integrity.
- Developed automated unit tests to ensure pipeline reliability.

Workout Builder & Tracker | Python, System Design

- Designing an application to create and track custom workout plans, utilizing file I/O for reliable data persistence.
- Modeling complex domains (Workouts, Splits, Exercises) using Object-Oriented principles, ensuring a modular and scalable codebase.
- Self-directed initiative to explore full lifecycle development, from requirement gathering to implementation and testing.

OOP Theatre Booking System | Python, Object-Oriented Programming

- Architected a reservation system to manage seat inventory and booking states, demonstrating strong command of class-based design.

Languages: Python, Java, HTML, CSS
Tools: GitHub Copilot, GitHub, Git VS Code, Microsoft Azure, Hugging Face, OpenAI, Google Antigravity, Replit
Concepts: Programming and Problem Solving, AI Fundamentals, Computer Architecture, Unit Testing, Data Engineering, OOP, REST APIs
Certifications: Microsoft Certified: Azure AI Fundamentals (2025)
