Tyler Prince

Kansas City, MO | Tp624@umkc.edu | 816.383.1228 | https://www.linkedin.com/in/tyler-ppwc | https://github.com/Tjprimc09

PROFESSIONAL SUMMARY

Product-minded professional with 10+ years of experience owning projects end-to-end, from requirements gathering and scoping through delivery and iteration. Combines entrepreneurial background in operations and stakeholder management with hands-on technical experience in software development, data workflows, and AI-enabled systems. Currently pursuing a B.S. in Computer Science at UMKC, with applied credentials in AI/ML. Proven collaborator who translates business needs into actionable solutions under real-world constraints.

EDUCATION

University of Missouri - Kansas City

Bachelor of Science in Computer Science. Activities: Roo Hackathon (Fall 2025); APEX AI-Prepared Experiential Credential (AI/ML/LLMs, unsupervised learning, NLP, deep learning, cloud deployment); Center of Excellence in Data Science and AI: AI-Empowered Spatial Computing (spatial data lifecycle, Python spatial data science, Unity AR/VR, geostatistical analysis). GPA: 3.8. *Expected 2029*

Relevant Coursework: Python and Java Programming, Discrete Structures, Physics, Calculus, AI Fundamentals, Data Fundamentals

EXPERIENCE

Freelance Web Developer 2016 – 2024

Reach Digital Positioning

- Scoped and delivered custom websites and digital solutions for early-stage startups and local businesses, managing projects from requirements gathering through launch and optimization.
- Collaborated directly with founders and stakeholders to translate business goals into technical solutions, balancing functionality, usability, performance, and timeline constraints.
- Improved discoverability and site performance through technical SEO, analytics integration, content architecture, and data-informed iteration.

Owner / Founder 2014 – 2024

Prince Professional Window Cleaning LLC

- Built a post-construction and commercial cleaning business from the ground up, growing from door-to-door outreach to a peak of 229 new clients in a single season and a team of 5 employees.
- Secured and managed contracts with recognized clients including Garmin International, Pembroke Hill Schools, high-rise buildings, hotels, luxury apartments, and corporate office buildings throughout Kansas City.
- Optimized business systems through continuous learning and iterative improvements to deliver increasing value and retain repeat business.

Community Organizer 2016 – 2020

1 Million Cups Kansas City

- Organized and emceed weekly startup events connecting founders, investors, and community leaders across Kansas City.
- Coordinated event logistics, presenter preparation, and stakeholder communication to ensure smooth execution and strong audience engagement.
- Coached founders in refining messaging and presenting ideas clearly to diverse audiences.

PROJECTS

Video Game Transaction Analyzer

https://github.com/Tjprimc09/video-game-transaction-analyzer

Python

- Engineered a data pipeline to ingest and validate large datasets of transaction records.
- Implemented robust error-handling and cleaning logic to filter malformed data and ensure data integrity.
- Developed automated unit tests to ensure pipeline reliability.

Network Intrusion Detection Dashboard https://github.com/Tjprimc09/NIDD

Python, Scikit-learn, React, Vite

- Built the backend training pipeline for a network intrusion detection dashboard using the KDD intrusion detection dataset.
- Preprocessed mixed network traffic features with scaling and one-hot encoding, mapped raw attack labels into broader intrusion categories, and removed leakage-prone fields before training.
- Tuned and evaluated a neural-network classifier with GridSearchCV using accuracy, precision, recall, F1, confusion matrix, and classification reporting, with logic to serialize the best model for deployment.

- Structured the project as separate backend and frontend applications, with a React/Vite frontend scaffold prepared for dashboard integration.

CERTIFICATIONS

- Microsoft Certified: Azure AI Fundamentals (2025)
- Data Science and Innovation Center: Unsupervised Machine Learning: Network Modeling and Clustering
- Data Science and Innovation Center: Introduction to AI / ML / LLMs

SKILLS

Product & Delivery: Requirements gathering, Project scoping, Stakeholder collaboration, End-to-end project ownership, Agile/iterative workflows, Technical SEO, Analytics integration

Languages: Python, Java, HTML, CSS, SQL

Tools: Git/GitHub, VS Code, Jupyter Notebooks, MLflow, AWS, Azure, Hugging Face, OpenAI, Replit

AI & Data: Machine learning workflows, NLP preprocessing/tokenization, Clustering, Network modeling, Deep learning fundamentals, MLOps workflows, LLMs, AI-driven development
