3423 NE Rock Creek Drive, Kansas City, MO, 64116, US | 8163831228

4.0 Computer Science student at UMKC with AI-900 & DB-900 certifications. Experienced in leveraging generative AI for rapid software engineering, debugging, and iteration. Currently building an AI-powered resume tailoring platform using React, Python, SQL, Azure OpenAI, Cognitive Search, and vectorization.

Education

University of Missouri-Kansas City

Jul 2025 - Present

Bachelor of Science Computer Science

GPA: 4.0

Projects

ResumAI

Jul 2025 - Present

Presently developing an AI-driven resume-tailoring platform.

- Architected a modular, enterprise-style ELT pipeline integrating Azure Functions, Data Lake, Cosmos DB, Azure OpenAI, and Cognitive Search for scalable, maintainable resume and job data processing.
- Designed a retrieval-augmented generation (RAG) workflow using semantic search, vector embeddings, and Azure OpenAI for context-aware resume generation.
- Implemented schema-based parsing with version-controlled data models to transform semi-structured text into clean, queryable structures for future scaling and model iteration.

Self-Booking Scheduling App

Jul 2024 - Present

Developed a React-based scheduling application for client booking, integrating Google Calendar API.

- Used ChatGPT to accelerate component development.
- Built a modular, component-driven React architecture for scalability and ease of maintenance.
- Integrated Google Calendar API for real-time syncing, enabling seamless user scheduling.
- Leveraged Al to accelerate development, debug, and refine Ul components.

Agentic Al Advisory System

Jan 2023 - Dec 2024

Directed the design of an Al-driven advisory board using large language models to simulate recursive dialogue among multiple persona-driven agents for decision-making support.

- Defined system architecture and behavioral models for persona-driven agents, focusing on recursive reasoning and structured dialogue flows.
- Collaborated with a certified Al architect to guide technical implementation and refine agent behaviors.

Work Experience

Director
Jan 2016 - Present

REACH Digital Positioning | Kansas City, MO

- Delivered end-to-end digital marketing solutions for small businesses and startups, including custom websites, technical SEO, and Google Ads campaigns.
- Used behavioral analytics (Google Analytics, Hotjar, Lucky Orange) to improve UX and conversion paths.
- Consulted founders on branding, audience positioning, and lead-funnel strategy to support early-stage growth.

Owner & Operator
Mar 2014 - Present

Prince Pro Window Cleaning | Kansas City, MO

- Built a solo residential service into a multi-site commercial operation, managing projects across 4 to 12-story buildings and up to 10 buildings per site.
- Directed operations, subcontractor coordination, logistics, and client management for large-scale post-construction and high-rise projects.
- Designed and launched a lead-generating website using WordPress, HTML, CSS, and SEO to drive consistent inbound growth in a competitive service market.
- Automated workflows with Zapier and implemented tracking systems (UTM parameters, Google Analytics) to optimize marketing ROI.

Co-Founder & Developer
Jan 2016 - Dec 2019

LaunchItSuccessfully

- Co-developed a startup accelerator and bootcamp, advising teams on web presence, conversion-driven design, and early-stage growth strategies.
- Led technical consulting for multiple startup teams, bridging business goals with practical implementation.

Core Skills

software engineering, programming skills, SQL, Python, docker, Devops, Software Development, production deployment, Data Infrastructure, data processing, data processing systems, cloud infrastructure, data warehousing, NoSQL, data collection, Azure, Data Modeling, AI/ML, nlp, Large Language Models, feature engineering, transformers, mlops, data preprocessing, scikit-learn, information retrieval, professional development, strong problem-solving skills, collaboration skills, Attention to Detail, work autonomously, communication, ethical, entrepreneurial, ability to prioritize, customer oriented, process oriented, Business Requirements, analytical skills, digital technology, digital services, customer facing, artificial intelligence, data-driven, Decision making, software design

Volunteer Experience

Organizer
Jan 2016 - Dec 2018

1 Million Cups Kansas City

- Curated weekly events spotlighting early-stage entrepreneurs, coordinated speakers, and facilitated Q&A sessions with founders and investors.
- Coached presenters on improving pitch clarity and messaging, fostering productive dialogue in public forums.
- Emceed the event and provided live-stream technical support for video broadcasting.
