TYLER PRINCE

Kansas City, MO | 816.383.1228 | Tp624@umkc.edu
LinkedIn: https://www.linkedin.com/in/tyler-ppwc | GitHub: https://github.com/Tjprimc09

Entrepreneur with over a decade of experience owning projects from start to finish and translating business needs into solutions. I bring hands-on experience using payment collection solutions like Stripe to handle payment processing and invoicing for my business. I am an early adopter of AI tools and I leverage them daily as a force multiplier and thinking partner.

PROFESSIONAL EXPERIENCE

Prince Professional Window Cleaning LLC | Owner / Founder | 2014 – Present

- Started and scaled a post-construction and commercial cleaning business from $0 to $350K seasonal revenue within 3 seasons.
- Responsible for all billing, invoicing, and revenue collection across hundreds of client accounts.
- Contracted with private schools, luxury apartments, hotels, and corporate campuses throughout Kansas City.
- Led and coordinated a team of up to 3 technicians, managing logistics and production quality in high-stakes environments to deliver results that secured repeat business.
- Transitioned the business to a streamlined repeat-client model to focus on completing a Computer Science degree and pursuing a product career.

Reach Digital Positioning | Freelance Web Developer | 2016 – 2024

- Delivered custom websites and digital solutions for early-stage startups and local businesses, managing projects from requirements gathering and scoping through launch and optimization.
- Worked directly with founders and stakeholders to translate business goals into technical solutions.
- Optimized discoverability and site performance for clients through iterative improvements in technical SEO, analytics integration, content architecture, and data-informed iteration.

1 Million Cups Kansas City | Community Organizer | 2016 – 2020

- Helped organize and emcee weekly startup events that connected founders, investors, and community leaders across Kansas City.
- Coordinated event logistics, presenter preparation, and stakeholder communication to ensure smooth execution and strong audience engagement.
- Supported founders in refining messaging and presenting ideas clearly to diverse audiences.

PROJECTS

Network Intrusion Detection Dashboard | Python, Scikit-learn, Pandas, React, Vite | https://github.com/Tjprimc09/NIDD

- Built the backend training pipeline for a network intrusion detection dashboard using the KDD intrusion detection dataset.
- Preprocessed mixed network traffic features with scaling and one-hot encoding, mapped raw attack labels into broader intrusion categories, and removed leakage-prone fields before training.

- Tuned and evaluated a neural-network classifier with GridSearchCV using accuracy, precision, recall, F1, confusion matrix, and classification reporting, with logic to serialize the best model for deployment.
- Structured the project as separate backend and frontend applications, with a React / Vite frontend scaffold prepared for dashboard integration.

Patient Queue Management System | Java | github.com/Tjprimc09

- Built a multi-department patient management system using a custom queue class that extends a provided abstract base, backed by an ArrayList with priority insertion so critical patients are served ahead of regular ones while preserving first-in-first-out order within each tier.
- Implemented a CSV intake pipeline with field validation and error logging, routing each record to the correct clinic queue and enforcing capacity limits.
- Designed a two-tier menu interface for admitting, treating, cancelling, and searching patients across three clinics, with transaction logs grouped by clinic and an end-of-day export of remaining patients to a reschedule file.

EDUCATION

University of Missouri - Kansas City | Honors Program
Bachelor of Science in Computer Science (2029)
GPA: 3.8
Relevant Coursework: Python and Java Programming, AI Fundamentals, Data Fundamentals
Activities/ Programs:

- **"Roo" Hackathon** (Fall 2025)
- **APEX: AI-Prepared Experiential Credential:** AI/ML/LLMs, unsupervised learning, NLP, deep learning, and cloud deployment for AI apps.
- **Center of Excellence in Data Science and Artificial Intelligence: AI-Empowered Spatial Computing Credential**: spatial data lifecycle (access, indexing, retrieval, entity resolution), spatial data science using Python, Unity programming for AR/VR, and spatial/geostatistical analysis.

Languages: Python, Java
Tools: Git, GitHub, VS Code, Jupyter Notebooks, MLflow, Scikit-Learn, Pandas, Numpy, PyTorch, AWS, Azure, Hugging Face, LLMs, AI-driven development
AI & Data Engineering: Machine learning workflows, NLP preprocessing/tokenization, clustering, network modeling, deep learning fundamentals, MLOps workflows
Credentials:

- Microsoft Certified: Azure AI Fundamentals (2025)
- Data Science and Innovation Center: Unsupervised Machine Learning: Network Modeling and Clustering
- Data Science and Innovation Center: Introduction to AI / ML/ LLMs
