Tyler Prince

Professional Experience:

Owner, Operator | Prince Pro Window Cleaning | 03/2014 – Present

Technical Problem Solver - Operations Lead - Systems Builder

- Business Leadership and Operations
    - Built and scaled a solo residential service into a multi-site commercial operation by developing systems for scheduling, staffing, and field coordination across complex, occupied job sites.
    - Engineered rope access solutions for high-rise and lift-inaccessible buildings, solving structural access problems through site analysis, safety planning, and technician coordination.
    - Managed client communication, subcontractors, scheduling, safety compliance, and quality assurance across long-term and high-risk projects.
    - Applied systems thinking to streamline field operations and increase project throughput.
    - Sustained high-level business operations while completing full-time Computer Science coursework, balancing logistics, client delivery, and technical execution without interruption.
- Technical Contributions and Systems Built
    - Taught myself web development, SEO, and digital marketing to establish a self-sustaining lead funnel and position the business in a competitive service market.
    - Implemented automation platforms such as Zapier to eliminate repetitive admin tasks and deliver a more responsive customer experience.

Director | Reach Digital Positioning | 01/2016 – Present

Solo Developer - Digital Strategist - Growth Consultant

- Strategic Leadership and Client Engagement
    - Led digital strategy for early-stage startups and service businesses, advising on messaging, brand positioning, and funnel design.
    - Managed client relationships, communication, and strategic planning independently.
    - Guided clients through iterative testing, campaign refinement, and performance evaluations to align digital strategies with business goals.
- Technical Contributions and Systems Built
    - Built and optimized websites using WordPress, HTML, CSS, and light JavaScript.
    - Directed SEO and Google Ad strategies to increase client visibility, lead generation, conversion, and keyword performance.
    - Configured and analyzed analytics platforms such as Hotjar and Google Analytics, using UTM-tagged URLs and user behavior data to attribute traffic sources and optimize conversion flows
    - Delivered production-ready features using traditional web tech and AI tools.

Organizer| 1 Million Cups Kansas City | 2016 – 2018

Founder Coach - Ecosystem Builder - Event Strategist

- Curated and hosted weekly events to highlight early-stage startups and founders.
- Managed logistics, scheduling, and live Q&A with investors, community leaders, and seasoned entrepreneurs.
- Coached founders to refine pitch clarity and messaging.
- Built ecosystem relationships across Kansas City's startup community.

Co-Founder and Developer | LaunchItSuccessfully | 01/2016 – 03/2019

Team Builder – Negotiator

- Co-developed a startup accelerator and bootcamp to support early-stage entrepreneurs.
- Advised founder teams on target market, messaging, product-market fit, digital strategy, and lean validation.
- Led technical consulting and web development support across multiple startup teams.
- Designed and optimized conversion funnels.

Selected Projects:

Concept Lead | Independent Agentic AI Advisory System | 2023-2024

Concept Lead - AI Product Vision - Persona Modeling and Testing

- Conceived and directed the design of an LLM-based agent system that simulates recursive dialogue among persona-driven advisors. Collaborated with a certified AI architect to define behavior models and guide implementation.

Builder, React | Self-Booking Scheduling App | 2025

Concept Lead - AI Product Vision - Persona Modeling and Testing

- Currently developing a client-facing scheduling system using React and integrating with Google Calendar API. Using prompt engineering with ChatGPT to accelerate learning and prototype components in a live-use context.

Technologies:

Frontend & Web: HTML, CSS, React (actively learning), JavaScript, WordPress
Marketing and Analytics: SEO (technical, on-page, and off-page), Google Ads, Google Analytics, Hotjar, UTM Tracking
Automation & API Integrations: Zapier, Google APIs
AI & Reasoning Systems: OpenAI
Current Focus Areas: component-based frontend development, AI-assisted system design, LLM-based agent workflows and reasoning, and AI-powered business automation.
