Tyler Prince

Professional Experience:

Owner, Operator | Prince Pro Window Cleaning | 03/2014 – Present

Technical Problem Solver - Operations Lead - Systems Builder

- Business Leadership and Operations
    - Built and scaled a solo residential service into a multi-site commercial operation by developing systems for scheduling, staffing, and high-risk site coordination.
    - Designed custom rope access solutions for high-rise buildings and lift-inaccessible structures through site analysis, safety planning, and technician alignment.
    - Managed subcontractors, client communication, compliance, and logistics across complex project timelines and environments.
    - Maintained high service consistency while completing full-time Computer Science coursework at UMKC.
- Technical Contributions and Systems Built
    - Designed and launched a branded website using self-taught HTML, CSS, and WordPress.
    - Created layout structure, navigation flow, and page design with intentional use of white space, alignment, and visual hierarchy.
    - Applied color psychology and user behavior principles to establish trust and clarity in the user journey.
    - Wrote conversion-focused copy to guide actions and reduce bounce rates.
    - Used Zapier to automate customer interactions, UTM tracking to attribute sources, and analytics to refine performance.

Director | Reach Digital Positioning | 01/2016 – Present

Solo Developer - Digital Strategist - Growth Consultant

- Strategic Leadership and Client Engagement
    - Translated rough client input into fully developed websites and digital assets using layout design, content hierarchy, and branding principles.
    - Led creative direction across projects, including messaging strategy, UX copywriting, and responsive structure.
    - Applied heuristic models such as proximity, visual grouping, and scan behavior to simplify interaction and reduce friction.
    - Used white space, typography, and alignment to produce visually clean interfaces that reflected the client's tone and voice.
    - Balanced multiple builds under deadline pressure while ensuring visual consistency and brand fidelity.
- Technical Contributions and Systems Built

Kansas City, Missouri 64116

(816) 383-1228

- Developed and deployed custom WordPress websites using HTML, CSS, and light JavaScript.
- Created responsive, accessible designs optimized for both user experience and technical performance.
- Built SEO infrastructure including metadata, alt structure, page speed, and content targeting.
- Ran Google Ads and tracked performance through Hotjar, Google Analytics, and UTM-tagged URLs.
- Delivered high-fidelity, production-ready sites that directly served business operations and conversion funnels.

Organizer| 1 Million Cups Kansas City | 2016 – 2018

Founder Coach - Ecosystem Builder - Event Strategist

- Curated and hosted weekly events to highlight early-stage startups and founders.
- Managed logistics, scheduling, and live Q&A with investors, community leaders, and seasoned entrepreneurs.
- Coached founders to refine pitch clarity and messaging.
- Built ecosystem relationships across Kansas City's startup community.

Co-Founder and Developer | LaunchItSuccessfully | 01/2016 – 03/2019

Team Builder – Negotiator

- Co-developed a startup accelerator and bootcamp to support early-stage entrepreneurs.
- Directed website and content development for early-stage teams, assisting with layout flow, branding, and copywriting.
- Led technical consulting and web development support across multiple startup teams.
- Advised on digital strategy, visual communication, and conversion-focused design.

Selected Projects:

Concept Lead | Independent Agentic AI Advisory System | 2023-2024

Concept Lead - AI Product Vision - Persona Modeling and Testing

- Conceived and directed the design of an LLM-based agent system that simulates recursive dialogue among persona-driven advisors. Collaborated with a certified AI architect to define behavior models and guide implementation.

Builder, React | Self-Booking Scheduling App | 2025

Concept Lead - AI Product Vision - Persona Modeling and Testing

- Currently developing a client-facing scheduling system for my business using React and integrating with Google Calendar API. Using prompt engineering with ChatGPT to accelerate React learning and prototype components in a live-use context.
