Summary

Computer Science student with AI-900 & DB-900 certifications and hands-on experience in developing data processing systems using Azure and Python. Currently building an AI-powered resume tailoring platform leveraging Azure OpenAI, Cognitive Search, and Data Lake technologies. Demonstrated expertise in turning business requirements into technical solutions, with strong analytical and problem-solving skills, complemented by a solid foundation in SQL and data warehousing.

Education

University of Missouri-Kansas City **Jul 2025 - Present**
Bachelor of Science, Computer Science
- **GPA:** 4.0

Work Experience

REACH Digital Positioning **Jan 2016 - Present**
Director *Kansas City, MO*
- Delivered end-to-end digital marketing solutions for small businesses and startups, including custom websites, technical SEO, and Google Ads campaigns.
- Used behavioral analytics (Google Analytics, Hotjar, Lucky Orange) to improve UX and conversion paths.
- Consulted founders on branding, audience positioning, and lead-funnel strategy to support early-stage growth.

Prince Pro Window Cleaning **Mar 2014 - Present**
Owner & Operator *Kansas City, MO*
- Built a solo residential service into a multi-site commercial operation, managing projects across 4 to 12-story buildings and up to 10 buildings per site.
- Directed operations, subcontractor coordination, logistics, and client management for large-scale post-construction and high-rise projects.
- Designed and launched a lead-generating website using WordPress, HTML, CSS, and SEO to drive consistent inbound growth in a competitive service market.
- Automated workflows with Zapier and implemented tracking systems (UTM parameters, Google Analytics) to optimize marketing ROI.

LaunchItSuccessfully **Jan 2016 - Dec 2019**
Co-Founder & Developer
- Co-developed a startup accelerator and bootcamp, advising teams on web presence, conversion-driven design, and early-stage growth strategies.
- Led technical consulting for multiple startup teams, bridging business goals with practical implementation.

Projects

ResumAl **Jul 2025 - Present**
- Designed and am currently developing an Al-driven resume-tailoring platform.
- Architected a modular, enterprise-style pipeline integrating Azure Functions, Data Lake, Cosmos DB, Azure OpenAl, and Cognitive Search for scalable, maintainable resume and job data processing.
- Designed a retrieval-augmented generation (RAG) workflow using semantic search, vector embeddings, and Azure OpenAl for context-aware resume generation.
- Implemented schema-based parsing with version-controlled data models to transform semi-structured text into clean, queryable structures for future scaling and model iteration.

Self-Booking Scheduling App **Jul 2024 - Present**
- Developed a React-based scheduling application for client booking, integrating Google Calendar API.
- Used ChatGPT to accelerate component development.
- Built a modular, component-driven React architecture for scalability and ease of maintenance.
- Integrated Google Calendar API for real-time syncing, enabling seamless user scheduling.
- Leveraged Al to accelerate development, debug, and refine Ul components.

Agentic Al Advisory System **Jan 2023 - Dec 2024**
- Directed the design of an Al-driven advisory board using large language models to simulate recursive dialogue among multiple persona-driven agents for decision-making support.
- Defined system architecture and behavioral models for persona-driven agents, focusing on recursive reasoning and structured dialogue flows.

- Collaborated with a certified Al architect to guide technical implementation and refine agent behaviors.

Core Skills

- **Programming & Development**: software engineering, programming skills, SQL, Python, docker, Devops, Software Development, production deployment
- **Cloud & Data**: Data Infrastructure, data processing, data processing systems, cloud infrastructure, data warehousing, NoSQL, data collection, Azure, Data Modeling
- **Data Science & Analytics**: AI/ML, nlp, Large Language Models, feature engineering, transformers, mlops, data preprocessing, scikit-learn, information retrieval
- **Professional & Communication**: professional development, strong problem-solving skills, collaboration skills, Attention to Detail, work autonomously, communication, ethical, entrepreneurial, ability to prioritize, customer oriented, process oriented, Business Requirements, analytical skills, digital technology, digital services, customer facing

Certificates

- **Al-900**: Microsoft Azure Al Fundamentals Aug 2025
  Microsoft
- **DB-900**: Microsoft Azure Data Fundamentals Sep 2025
  Microsoft
- **SEO Fundamentals**: UC Davis
- **Advanced SEO**: UC Davis
- **Digital Marketing Fundamentals**: Google

Volunteer Experience

1 Million Cups Kansas City **2016 - 2018**

Organizer

- Curated weekly events spotlighting early-stage entrepreneurs, coordinated speakers, and facilitated Q&A sessions with founders and investors.
- Coached presenters on improving pitch clarity and messaging, fostering productive dialogue in public forums.
- Emceed the event and provided live-stream technical support for video broadcasting.
